

# FLEXIBLE DATA SCREENS

Deploy New Screens Overnight -  
With Zero IT Costs!

- Do you have a new or unique state or local program in your One-Stop system?
- How quickly can your IT department or vendor respond to new mandates?
- Do you have the staff, time and budget to modify your information systems?

**AOSOS** has the answer. **AOSOS** is designed to be flexible, open and highly extensible, meeting a broad variety of state and local needs. **AOSOS** Flexible Data Screens empower states to deploy full-featured, fully integrated screens to capture a virtually unlimited number of new data elements. Each Flexible Data Screen is fully functional and fully integrated with the rest of the application and comes complete with audit data, print options, and user documentation.

## FEATURES

- Can be set up anywhere in the application.
- Full range of edits and cross edits.
- Searchable data fields.
- Configurable system-generated reminders.
- All input types supported, such as drop downs and checkboxes.
- Custom value lists for drop downs.

## BENEFITS

- State and local control.
- Overnight implementation.
- Zero IT costs.
- Streamline program and reporting workflow.
- Program outcomes tracking.

## SECURITY

- Robust security at WIB, agency and office levels.

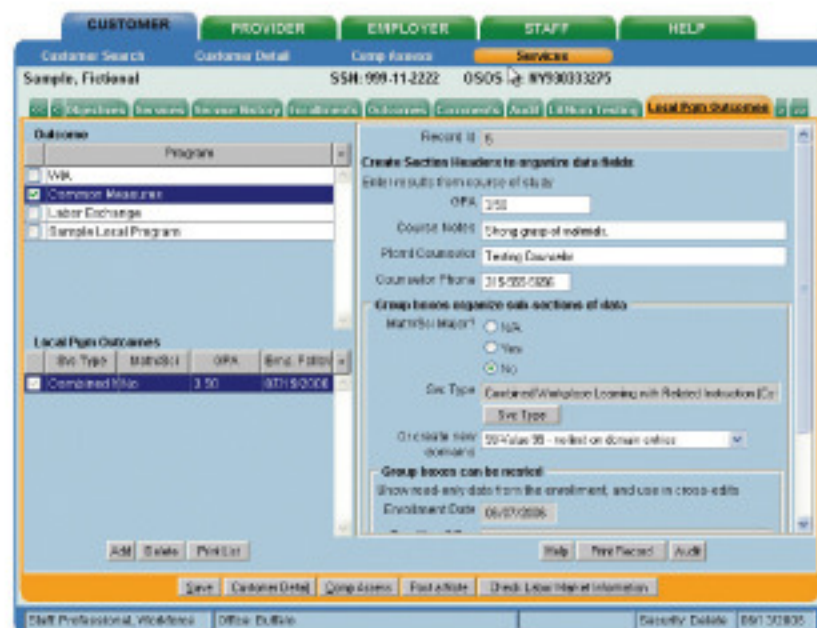

## EASY TO SETUP & MAINTAIN

- Simple administration screens.
- Can be modified as your needs evolve.
- Copy existing field definitions.
- Supporting documentation and training.

## EASY TO USE

- Fully integrated with core **AOSOS** application.
- Seamless look and feel.
- Complete with user help documentation.

With the **AOSOS** Flexible Data Screens feature, states can define a broad set of characteristic and outcome data fields to support all of their programs and local partners. This enables the state to achieve truly universal case management within its larger One-Stop vision - all with one integrated solution. **AOSOS** empowers you to meet and exceed ever-increasing system delivery expectations with zero additional IT costs.

**AOSOS** Flexible Data Screens enable rapid, feature-rich implementation without IT development costs. Even non-technical users can deploy complex screens right from their desktop.

"The AOSOS Flexible Data Screen feature lets New Jersey define a virtually unlimited number of new data collection screens, complete with business logic, search capabilities and security, all through a user-friendly administration module. By enabling overnight implementation of new programs, characteristics and outcomes, AOSOS provides world-class support for meeting the diverse needs of New Jersey's One-Stop partners."

- Steve Reenstra, New Jersey Dept. of Labor and Workforce Development

## Set-up and Control

To make Flexible Data Screen set-up simple, AOSOS provides all necessary screens to guide the set up process. You define the fields needed, their edits and business rules. You can add, change or delete values from drop-down lists, or re-use value lists from other screens. You can even copy field definitions from existing AOSOS screens into new screens. Flexible Data Screens can also be set up to display view-only data from higher level screens. For example, a Flexible Data Screen which gathers local outcomes for a program can show the participation and exit dates from the enrollment.

Once Flexible Data Screens are defined, the application generates all necessary data tables and software components, including help screens, based on the rules set up by the administrator. As your needs evolve, you can add or remove fields, or change the edits and business rules.

Since Flexible Data Screens are fully securable to the WIB, agency and/or office levels, any sensitive program information can be protected while retaining a comprehensive view of the customer's experience.

## Summary

AOSOS Flexible Data Screens are efficient, effective and powerful. This breakthrough feature is absolutely unique, enabling you to quickly and confidently respond to evolving federal, state and local needs. They are easy to set-up and easy to modify. They are fully integrated, full-featured, searchable and secure. You can deploy entirely new screens overnight with zero IT costs. Flexible Data Screens empower you to support the specific and unique data requirements of your state, WIBs and partners - right at your desktop.

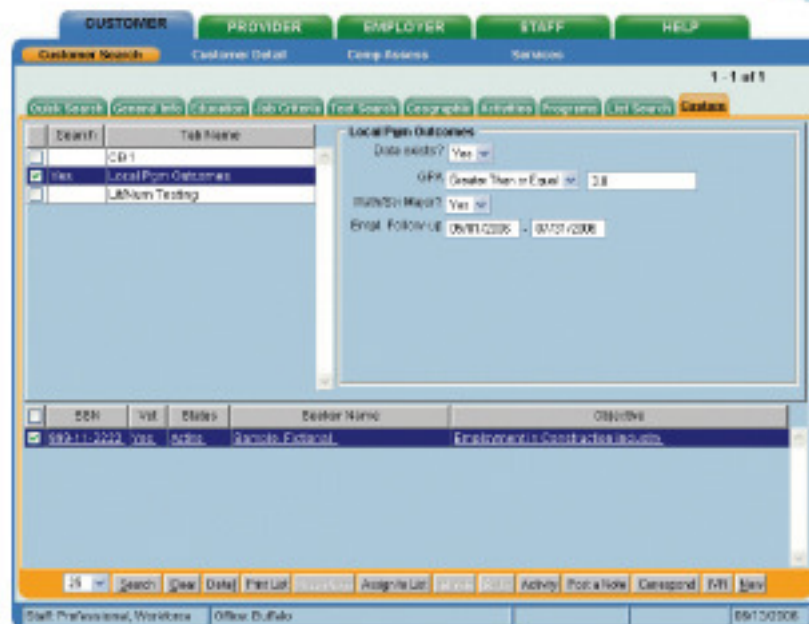

## Contact Us

AOSOS is a unique web-based, one-stop operating system designed to help states and Workforce Investment Boards effectively and efficiently meet the requirements of the Workforce Investment Act, Common Measures and beyond.

Visit the AOSOS Info Site to view detailed information about AOSOS and the Consortium at: <http://www.ososinfo.org>

To make arrangements for a demonstration of AOSOS to your organization, please email us at: [ososinfo@labor.state.ny.us](mailto:ososinfo@labor.state.ny.us)

The AOSOS Consortium invites states to take advantage of this application designed by and for workforce and economic development professionals.

With AOSOS Flexible Data Screens, you can set up customized search terms on the fly!
